

Mini Jell-O Parfaits

- One 6-ounce package Jell-O *see note below
- 2 cups boiling water
- 2 cups cold water
- Cool Whip
- Blueberries

Make Jello per package directions. Stir boiling water with Jell-O mix in large bowl or spouted container for two minutes. Add cold water and stir until combined. Pour into dessert glasses and refrigerate until firm, up to four hours.

Top with Cool Whip and fruit and serve.

NOTES: You can choose the color combination you'd like. If you can find blue Jell-O, then reverse color top with sliced strawberries.

These can also be made in the RV. No changes except don't drive while the Jell-O is still setting. I'd hate for you to have a huge Jell-O mess on your hands.
